PROFESSIONAL SUMMARY

I work as a full-stack developer at a software company. With two years of experience, I specialize in web development, project management using Agile methods, and quality testing. I handle projects independently from start to finish, ensuring high-quality results and following Agile practices.

EXPRIENCE

Full Stack Web Developer: Tribe Web Solutions | Bhilai, India   **Fab 2023 - Present**

- Led the end-to-end development of a Hotel Reservation web application and a laser technology product landing page using the MERN stack (MongoDB, Express.js, React.js, Node.js). Managed UI/UX design, implemented workflow systems, and executed system design for optimal functionality.
- Orchestrated the development and implementation of a comprehensive billing software application using Electron.js. Managed UI/UX aspects, coordinated workflow systems, and oversaw system design to streamline billing operations effectively.
- Spearheaded the creation of a mobile billing software application utilizing Capacitor.js. Oversaw UI/UX design, established workflow systems, and implemented system design strategies to ensure user-friendly functionality across various platforms.
- Contributed expertise to WordPress projects, playing a pivotal role in UI/UX enhancements, workflow system optimization, and system design implementations for diverse web solutions.
